

## **Rialto Energy**

Rialto Energy says it has encountered encouraging oil and gas shows while drilling the Gazelle-P3 ST well in block CI-202, offshore Ivory Coast.

The oil and gas shows, which will be evaluated by wireline logging and fluid and pressure sampling once the well reaches a depth of 3400m, were encountered while drilling the well to a depth of 3161m.

The Gazelle-P3 ST well is the first of a three-well drilling program in CI-202 which is anticipated to take six months to complete, including testing.
