

## **Rialto Energy**

Rialto Energy is planning to drill and log the Upper Cenomanian section of its Gazelle-P3 ST well off the coast of Ivory Coast this week.

Drilling is currently down at 2181m using the Transocean GSF Monitor jack-up rig.

The Gazelle-P3 ST well is the first of a three-well drilling program on the CI-202 that is anticipated to take six months to complete, including testing.
