

Polarcus Completes 3D Seismic Acquisition, Block CI-202

Source: www.gulfoilandgas.com 1/19/2012, Location: Africa

Rialto Energy Limited (Rialto or the Company) is pleased to announce that a block-wide, full-fold 3D seismic survey covering 891km² has been completed over Block CI-202 (Rialto 85% and Operator) with contractor Polarcus DMCC.

Processing and interpretation of the newly acquired data will commence shortly and will provide Rialto with a full suite of 3D data over the entirety of Block CI-202. This will allow Rialto to further refine existing interpretation and mapping of the exploration potential within Block CI-202 through better definition and mapping of the multiple prospects and leads already identified. Further, this work will provide an even greater understanding of the 5 existing discoveries and culminate in better definition of these existing resources.
